

RAO INSULATIONS

ENGINEER & CONTRACTOR

Since 1990

ABOUT US

Rao Insulations is a well known vadodara based company expertizing in industrial contracting operations and maintenance services since 1990. The company has wide exposure in entire city and surrounding areas. We have an excellent reputation in the market, all thanks to our satisfied customers. Our services include hot insulation, cold insulation, acoustic insulation work in Pharmaceutical plants, Chemical plants, Refineries etc. along with water proofing jobs in industrial and commercial sectors, schools, residential areas and hospitals.

WHY RAO INSULATIONS

Our experience of several years has enabled us to enhance client assets with best grade insulation in addition to reduced energy consumption. Having well-resourced in sophisticated machinery and tools along with dedicated expert professionals to execute the job we are able to provide insulation that increases the productivity, safety and reliability of production plants within the established time limit.

We have accomplished insulation assignments with various materials ranging from -200°C to 1500°C . Above all, the prime focus of our company is to deliver finest results at affordable rates.

SERVICES

» Hot Insulation Work

We are counted on the top position of Hot Insulation Services Providers in the list of prominent service providers in India. We provide excellent hot insulation services to our clients and take care of their demands and needs.

We have successfully done hot insulation jobs ranges between 0 C to 1500 O'C. The vessels and pipelines to be insulated will be cleaned so as to make the same free from dust and grease.

These vessels and pipe lines will be covered with L. R. B. or L.R.B pipe sections, R.B slabs / Ceramic wool&Fiber Glass The final finish will be given with Aluminum Cladding Plaster work or FRP sheet.The Choices of insulation material and covering can be as per clients choice or if needed can be suggested by our company so as to provide the best results in most competitive prices.

» Cold Insulation Work

Being the leading and distinguished Cold Insulation Service Providers in India, we provide high-quality and best cold insulation services to our valuable clients. Our motive is to fulfill the needs of customers.

The cold insulation work comprises between temperatures - 200°C to 20°C. The vessels and pipelines to be insulated will be cleaned so as to make the same free from dust and grease. These vessels and pipelines will be applied with bituminous coating and insulation of Thermocol / PUF will be fixed with bitumen compound.

SERVICES

The final finish could be aluminum sheet Plaster work or FRP sheet. The choices of insulation material and covering can be as per clients choice or if needed can be suggested by our company so as to provide the best results in most competitive prices.

» Acoustic Insulation Service

The Acoustic insulation is a soundproofing technique that prevents or minimises sound from entering or exiting an enclosed space by creating a barrier between the interior and exterior areas.

It reduces the sound emitted from the structures of a room as well as acoustic reverberation. we provide acoustic Insulation services in commercial and Industrial sectors. Materials are selected as per company specification or Demands.

» Maintenance Service

In our many years as service providers in industrial insulation maintenance service, we have come across to diagnose inefficient industrial machine maintenance processes that is providing all types of Hot & Cold Insulation services.

Industrial Insulation maintenance will be carried out by our specialized insulation technician in close collaboration with the Maintenance engineer and plant incharge.
